ABOUT ME

I'm a software developer looking to improve myself every day and help make every project I work on better than I found it. Proud husband and caretaker to a horde of small fuzzy lifeforms.

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER

APR 2021 – PRESENT

Global Payments Integrated / Lindon, UT

- Security Champion responsible for implementing secure coding practices and managing security backlog and reviews
- Consulted and led discussions that helped form company wide security best practices
- Implemented deployment automation pipelines via jenkins to bring code from dev to prod with integrated testing
- Helped design, implement, and deploy consolidation projects using micro frontends Via React, C# and .Net

SOFTWARE ENGINEER

SEPT 2016 – APR 2021

Health Equity / Draper, UT

- Helped plan, create, and implement a modern investment portal using C#, MySQL, and Angular 10
- Helped create and maintain automated testing using Selenium
- Led discussions and initiatives for multi team testing across full stack teams
- Analyzed and created documentation to explain data flow through multilayer legacy apps

SOFTWARE DESIGNER/DEVELOPER

JAN 2016 – AUG 2016

Almanac Systems / Idaho Falls, ID

- Developed apps in C# and .Net
- Database maintenance, normalization, and recovery for both Microsoft SQL Server and SAS Databases
- App diagramming and recreation from minimal information

IMPLEMENTATION DEVELOPER

APR 2014 – JAN 2016

currIQnet / Idaho Falls, ID

- Created custom reporting solutions to meet customer needs and specifications
 - Imported data across databases and versions and data reconstruction
 - Bridged a gap separating QA from dev teams and fostered relations between the two
 - Helped create and mentor technology and QA standards across the company
-
